The Brookfield Farmers Market is a recipient of a specialty crop grant through the Illinois Department of Agriculture. Grant money will be used for advertising, publicizing our operation, promoting local farms, and educating the public on specialty crop farmers and their products. The market will partner with the Brookfield Library for the education portion of the grant and will also work with individual vendors to develop an on-site display that explains their own growing techniques/processes.

New for 2010, the market is planning special events and activities throughout the market season. We welcome you to our friendly market as a gathering place, as well as a destination to buy fresh and local produce. .
